## FedEx® Flat File Reporting Tool 4

The FedEx Flat File Reporting Tool is a helpful client-based software application that lets you view and organize your FedEx® Billing Online data using reports customized to your particular needs. And since the FedEx Flat File Reporting Tool stores your data locally on a SQL database, you are not required to have an active Internet connection while using the application and your storage capacity is up to you.

What else can you do with the FedEx Flat File Reporting Tool?

### Improve efficiency

Since you'll be able to easily allocate your costs, you can bill customers more quickly and possibly even increase your bottom line.

### Run fully featured reports

The FedEx Flat File Reporting Tool contains more than 20 pre-defined reports that can be run using your FedEx Billing Online data.

### Create your own reports

The FedEx Flat File Reporting Tool allows you to modify the existing pre-defined reports to meet your needs, or to create your own completely custom reports from scratch.

### Change the display of report elements

After running a report, you can change the report groupings, sort by different columns, and even rearrange the report columns.

### Manage information from multiple sources

Since the FedEx Flat File Reporting Tool allows you to have multiple reports from different data sources open at the same time, side-by-side data comparisons are simple.

### Conveniently access archived data

Data archived or moved to another database can be easily accessed within the FedEx Flat File Reporting Tool – without extra configuration steps.

To learn more about the FedEx Flat File Reporting Tool, we've created an [online demo](#) and a convenient [Help Guide](#). In addition, we invite you to read the [Frequently Asked Questions](#) and refer to the [Quick Start Guide](#) to help you get started using the FedEx Flat File Reporting Tool swiftly.
